

ANDRIAN SYAHPUTRA

Senior Quality Assurance Engineer · AI Systems Validation Specialist · International Remote QA

andriancodings@gmail.com · +62 822-8473-6764 · Bandung, Indonesia · linkedin.com/in/riantra

PROFESSIONAL SUMMARY

Research-driven Quality Assurance Engineer with 3+ years of hands-on experience working **fully remote for international companies and clients** across **Russia, USA, Canada, Australia, China, Malaysia, and Indonesia**. Specialist in AI system output validation, scalable test automation architecture, and enterprise-grade quality assurance for complex, data-intensive platforms. Originally engaged as a freelancer by a Russia-based AI company in 2024 — **continuously retained due to exceptional delivery, zero missed deadlines, and consistent ability to independently solve problems no one else could crack**. Known for a methodical research-first approach: actively studying new QA methodologies, evaluating toolchains, and proposing innovations that reduce cost and elevate quality. Proven results: **95–98% bug-free releases** · test coverage **+60%** · debugging time **-90%** · QA efficiency **+80%**.

REMOTE WORK TRACK RECORD Continuously engaged as a remote freelancer since May 2024 — **originally hired on a freelance basis by NerdHeadz (Russia) and have been retained ever since**, delivering across 9+ products for international clients in the US, Canada, Australia, China, and more. Self-directed, async-first, and zero missed deadlines across all remote engagements.

PROFESSIONAL EXPERIENCE

Freelance Quality Assurance Engineer

May 2024 – Present

NerdHeadz | Remote — Russia-based Company — *Serving clients in USA, Canada, Australia, China & more*

International AI product studio headquartered in Russia, delivering software products for clients across North America, Asia-Pacific, and beyond. Engaged as a freelancer — continuously retained to present.

- Led QA strategy across **9 international AI and infrastructure products** spanning delivery, social media, job marketplace, investor intelligence, AI document management, EdTech, and mobile community platforms — all delivered fully remote.
- Researched and built **AI output validation frameworks** covering adaptive learning, predictive logic, recommendation accuracy, thesis-alignment modeling, dataset consistency, and document intelligence — applied across products serving US, Canadian, and Australian markets.
- Engineered a **Playwright hybrid UI + API performance testing framework** with auto-reporting dashboards, exposing critical load bottlenecks entirely undetectable by API testing alone.
- Architected **Cypress scalable automation suites** increasing test coverage by 60% and eliminating manual regression overhead across the product portfolio.
- Produced developer-optimized bug reports with reproduction steps that **cut debugging time by up to 90%** — consistently flagged as best-in-team by engineering leads.

- Operated and thrived in a **fully cross-cultural, cross-timezone remote environment** (Russia, Indonesia, US, AUS timezones) — zero missed deadlines, zero escalations.

Quality Assurance Engineer

Oct 2023 – Apr 2025

PT. Trans Teknologi Indonesia (Transtrack) | Bandung, Indonesia — Clients: Malaysia, Singapore & Multinational Corporations

Indonesia-headquartered enterprise software company building GPS and logistics platforms. QA ownership for international deployments serving Malaysia (JAKIM), Singapore, and Apical – APRIL Group.

- Delivered **LSI Telematik** GPS fleet monitoring system with 98% bug-free production release for Apical – APRIL Group; improved GPS hardware precision by 75% through rigorous hardware-software integration testing.
- Led QA for **Halal Logistic Tracking System (JAKIM, Malaysia)** — cross-border halal compliance platform with GPS E-Seal smart locks, vendor certification tracking, and international supply chain validation.
- Independently researched and implemented a **self-hosted test case management solution** — eliminating significant monthly subscription costs; adopted company-wide.
- Elevated team QA productivity by **80%** through structured documentation, environment standardization, and automation rollout. Mentored junior QA engineers on research-driven debugging and professional test design.
- Engaged in early-stage feature feasibility validation — catching conceptual defects **before development commenced**, preventing costly mid-sprint rework cycles.

Freelance Mobile QA Engineer

Jun 2024 – Aug 2024

Pradini | Remote — Indonesia — Healthcare Mobile Application

- **95% bug-free mobile releases** for a premature newborn care app — a domain where QA quality carries direct patient safety implications.
- Cross-platform validation (iOS + Android); domain-informed test design contributed to a **45% increase in user trust and app adoption** post-launch.

Quality Assurance Intern

Jun 2023 – Aug 2023

PT. Sagara Teknologi | Remote — Indonesia

- Created **1,000+ test scenarios** across two concurrent web projects; identified 50+ bugs; optimized application quality by 90%. Test documentation adopted as team reference standard.

Quality Assurance Intern — Astra PAMA CAPEX

May 2023 – Aug 2023

PT. Didayah Olah Teknologi Indonesia (DOT) | Remote — Indonesia

- QA on capital expenditure platform for Astra PAMA (Astra International Group subsidiary). Reported ~30 bugs with structured reproduction steps; workflow approval testing via QASE.

CORE COMPETENCIES

• Cypress (UI + API Automation) • Playwright (Hybrid Perf. Testing) • Selenium & Appium (Mobile QA)	• k6 & JMeter (Load & Perf. Testing) • Postman (REST API Testing) • BugBug.io (No-code Automation)	• GitLab CI/CD Integration • QASE Test Case Management • Notion-Based QA Dashboards
• AI Output Validation & Integrity • Adaptive Learning System QA • Recommendation Engine Testing	• Predictive Logic Verification • Dataset Consistency Monitoring • Anomaly Detection Validation	• GPS & Hardware Integration QA • Cross-Platform Mobile Testing • API + UI Hybrid QA Strategy
• Agile / Scrum QA Workflow • TDD & BDD Implementation • Waterfall Process Testing	• Test Case Design & Execution • Root Cause Analysis & RCA Reports • Early-Stage Feasibility Validation	• Bug Report Engineering (dev-ready) • Regression Test Ownership • Junior QA Mentoring & Coaching
• Remote-First Delivery (since 2024) • Async Communication & Docs • Self-Directed Independent Work	• Cross-Timezone Collaboration • International Client Management • Multi-Product Parallel QA Ownership	• Cross-Cultural Team Navigation • Freelance Reliability & Retention • Zero Missed Deadlines Record

PROJECT PORTFOLIO

9+ AI & enterprise products delivered remotely across 6 countries.

PROJECT	EMPLOYER	DOMAIN	KEY ACHIEVEMENT
Hardcopy	NerdHeadz	AI Document Intelligence	Validated AI doc parsing, OCR accuracy, smart search relevance, doc classification logic, and storage API reliability across enterprise-scale document ingestion
Nexus	NerdHeadz	AI Investor Intelligence	Built dataset refresh integrity framework; investment signal accuracy & intelligence refresh validation
Uplinked	NerdHeadz	AI Social Media Platform	Custom AI content recommendation validation; relevance accuracy & engagement logic testing
ClearJet	NerdHeadz	Delivery Infrastructure	End-to-end logistics pipeline QA; zero critical defects in production; delivery routing logic fully validated
FutureSpark	NerdHeadz	AI Student Learning	Adaptive learning path validation, thesis-alignment checks, predictive content accuracy testing

PROJECT	EMPLOYER	DOMAIN	KEY ACHIEVEMENT
Fixzanet / FizzaNet	NerdHeadz	AI Job Marketplace	AI job-matching accuracy across 100+ scenarios; candidate-role alignment validation framework
Cytrus.Ai	NerdHeadz	Commercial AI Platform	Anomaly detection & dataset consistency validation across continuously refreshed AI intelligence pipelines
Codebeu	NerdHeadz	AI Mobile Community App	Cross-platform iOS/Android QA; AI-driven community interaction and moderation feature validation
BusyBee	NerdHeadz	EdTech / Education App	Playwright hybrid UI+API performance testing; uncovered critical load bottlenecks invisible to API-only testing
LSI Telematik	Transtrack	GPS Fleet & Shipment Monitor	98% bug-free release for Apical–APRIL Group (Southeast Asia's largest agribusiness); GPS precision +75%
Halal Tracking System	Transtrack	Cross-border Halal Compliance	GPS E-Seal + vendor certification QA across international halal supply chains; zero compliance defects in launch
MyTask	Transtrack	Internal Workflow Mgmt	Full regression suite built from scratch; workflow productivity validation; structured test documentation baseline
Premature Care App	Pradini	Healthcare Mobile (iOS & Android)	95% bug-free releases; 45% post-launch user trust increase; zero critical regressions across all releases
Astra PAMA CAPEX	DOT Indonesia	Enterprise CapEx Platform	~30 bugs identified & resolved; workflow approval testing; UX improvements adopted by dev team
Techno Consulta & Jobfortech	Sagara Teknologi	Web Platforms (2 concurrent)	1,000+ test scenarios; 50+ bugs; application quality optimized by 90%

EDUCATION

Bachelor of Science — Computer Science

2019 – 2023

Universitas Islam Negeri Sumatera Utara | Medan, Indonesia

- **IYSA Silver Medal (2021)** — International Young Scientist Association; competed against researchers from 30+ countries in international scientific innovation.
- **Karya Salemba Empat (KSE) National Scholarship 2020–2023** — Indonesia's most competitive merit-based scholarship for elite high-performing students.
- Outstanding Student Award: UINSU Talent 2021 | 3rd Best Speaker — PKM 2 National English Debate (2021).
- Chairman, KSE UINSU Scholarship Organization (2022–2023) | Chairman, Community Development Division (2021–2022).

High School Exchange Student — United States of America

2017 – 2018

Keya Paha County High School | Nebraska, United States

Competitively selected from thousands of Indonesian applicants for the prestigious government-sponsored Bina Antar Budaya Youth Exchange Program.

- 3rd Place — FFA Regional Competition, Nebraska, USA; served as International Education Volunteer representing Indonesia.
- Gained full professional English fluency and cross-cultural adaptability — directly applied across international remote career engagements.

CERTIFICATIONS & TRAINING

- QA Engineer Bootcamp — DTS Kominfo × Binar Academy | Score: **91.5 / 100** (2023)
- AWS Cloud Practitioner Essentials — Dicoding (2023)
- Performance QA — Evermos × Rakamin: k6 Load Testing, **1,000 Virtual Users**, API SLA Validation (2023)
- API Testing & Automation — Jubelio × Rakamin: Postman + Selenium Framework (2023)
- Full Stack Developer: Ruby & Ruby on Rails — Fresh Graduate Academy (2022)

LANGUAGES

English — Professional Working Proficiency (validated through years of international remote work with Russia, US, Canada, AUS clients)

Bahasa Indonesia — Native / Full Professional Proficiency
